

JOALYS

The ring sizer

Your ring size, to the millimeter.

Two pages, to print at 100%. The first is read, the second is cut: a graduated strip and twenty-eight discs, at true scale.

1

You wear a ring that fits

Lay it flat on the discs on page 2. Your size is the disc that fills the inside of the band exactly: no white rim, no disc hidden under the metal.

2

You have no ring at hand

Cut out the strip on page 2, slide the tongue through the slot and fit it at the base of the finger, without squeezing. The number at the edge of the slot is your size.

3

It is a surprise

Discreetly borrow a ring worn on the same finger, ideally a thin band, and lay it on the discs. Between two sizes, keep the larger.

WHAT SKEWS THE MEASURE

The hour

Fingers are thinner on a cold morning, fuller in the evening. Measure at the end of the day, hands neither cold nor warm.

The knuckle

Larger than the base of the finger? Measure both and choose in between: the ring must slide over, then stay.

The width

A wide band, 6 mm and over, fits tighter. Allow half a size up.

Between two sizes

Keep the larger. A ring that is too tight is hard to take off.

CONVERSIONS

CIRC. mm = EU size	DIAMETER	US	UK	IT · ES · CH
44	14.01 mm	3	F	4
45	14.32 mm	3¼	G	5

71	22.60 mm	13½	Z+2	31

US sizes to the quarter, UK to the half letter. Jewelers' charts differ by about a quarter size: the millimeter is the reference.

Lay a bank card here.

It must cover this frame exactly. If it does not,
the scale is wrong: print again.

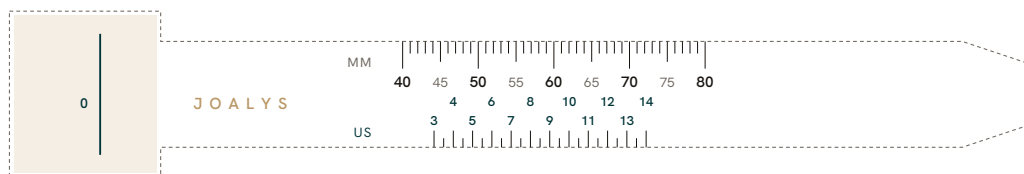

85.6 × 54 mm

Or, with a ruler: 50 mm.

THE STRIP

- 1 Cut along the dotted line.
- 2 Slit the slot line with a craft knife.
- 3 Slide the tongue through the slot, fit it at the base of the finger.
- 4 Read at the edge of the slot.

No knife: wrap the strip, lay the slot
line on the scale and read
underneath.

THE DISCS

Inside circumference in millimeters (EU size), diameter below.

						
44 14.01 mm	45 14.32 mm	46 14.64 mm	47 14.96 mm	48 15.28 mm	49 15.60 mm	50 15.92 mm
